COUNTRIES

**Design.
Technical Experience.
Global service.**

Own manufacture. Technology. Proximity.

The combination of 52 looms with the latest technology optimizes manufacturing to ensure a **delivery time between 1 to 30 days.**

500 thousand meters of finished fabric of excellent quality, created with **natural polyester yarns and fire-resistant fibers** such as Trevira CS, in a variety of colors, textures, and structures, ready to use.

We **only** rely on the proximity industry to supply us with raw materials in order to ensure **product quality, complete control, and responsible manufacture.**

(Co) Develop. Added Value.

Four decades developing and perfecting high quality products as well as creating own and personalized inspiring collections in collaboration with the **Instituto Tecnológico Textil (AITEX)** and with **European laboratories of recognized prestige** as IFTH and FCBA in France or HOCH in Germany, among others.

(Co) development is the process through which Dabedan engineers collaborate closely with you to build unique solutions, tailored to each of your projects and **incorporating our technology into your value chain.**

Innovation. Beyond aesthetic.

PRO CLEAN

We have managed to develop a fluorocarbon polymer, free of PFOA and PFOS contaminants, which does not form a film, but a network around the fiber and does not influence the flame retardant effect.

- Water repellent.
- Dirt repellent.
- Breathable.
- Durable.
- Light fastness.
- Abrasion resistant.

CLINIC

In partnership with medical professionals, we have developed an **antibacterial treatment** applicable to any tissue aimed at hospitals, medical facilities and other spaces so that they remain 100% sterile, preventing the spread of *Staphylococcus Aureus* and *Klebsiella Pneumoniae*, the most dangerous bacteria in healthcare sector.

Innovation. Beyond aesthetic.

ACOUSTIC 3D

It's a **3-dimensionally structured technical fabric** that improves the comfort of any environment by isolating it from outside noise and boosting acoustic quality.

Acoustic 3D is fire-resistant fabric and has an **Alpha 0.95** (UNE-EN ISO 11654: 1998) rating. It's designed for curtains, panels, and ceilings in theaters, auditoriums, restaurants, classrooms, and other public spaces where ideal acoustics are required.

EXTRA DARK NIGHT

It's **the first fabric made without resins or polymers** that completely blocks out light and ensures **complete opacity**.

Because it is made entirely of textile, it has a **more pleasing touch** and a more natural appearance than a traditional one. It's a machine-washable cloth that can be washed as many times as needed, is recyclable, and was made in a way that is **environmentally friendly and safe for human health**.

Certified high-quality.

All Dabedan products are submitted to a **stringent quality control system** at our own plants, as per protocol.

Each fabric is tested by the Quality Department, which **collects data, analyzes it, and verifies that it meets inter- national criteria** for fire resistance, tensile strength, light fastness, abrasion, pilling, and all other attributes that define a high-quality fire-resistant fabrics.

As European leaders in the creation of fire-resistant fabrics, our products meet with **international fire resistan- ce laws** as well as the specific regulations of the different countries.

The **high quality** of the fabrics can only be understood from:

The deep respect for **tradition** and textile **heritage**.

The full confidence in **research** and **development**.

The firm commitment with the **latest generation** technologies.

The **control** of all details of the production processes.

The real **commitment** and **responsibility** to the planet.

Inspiration and great stories are born from the smallest details.

”

JULIO PERET

COO, Dabedan

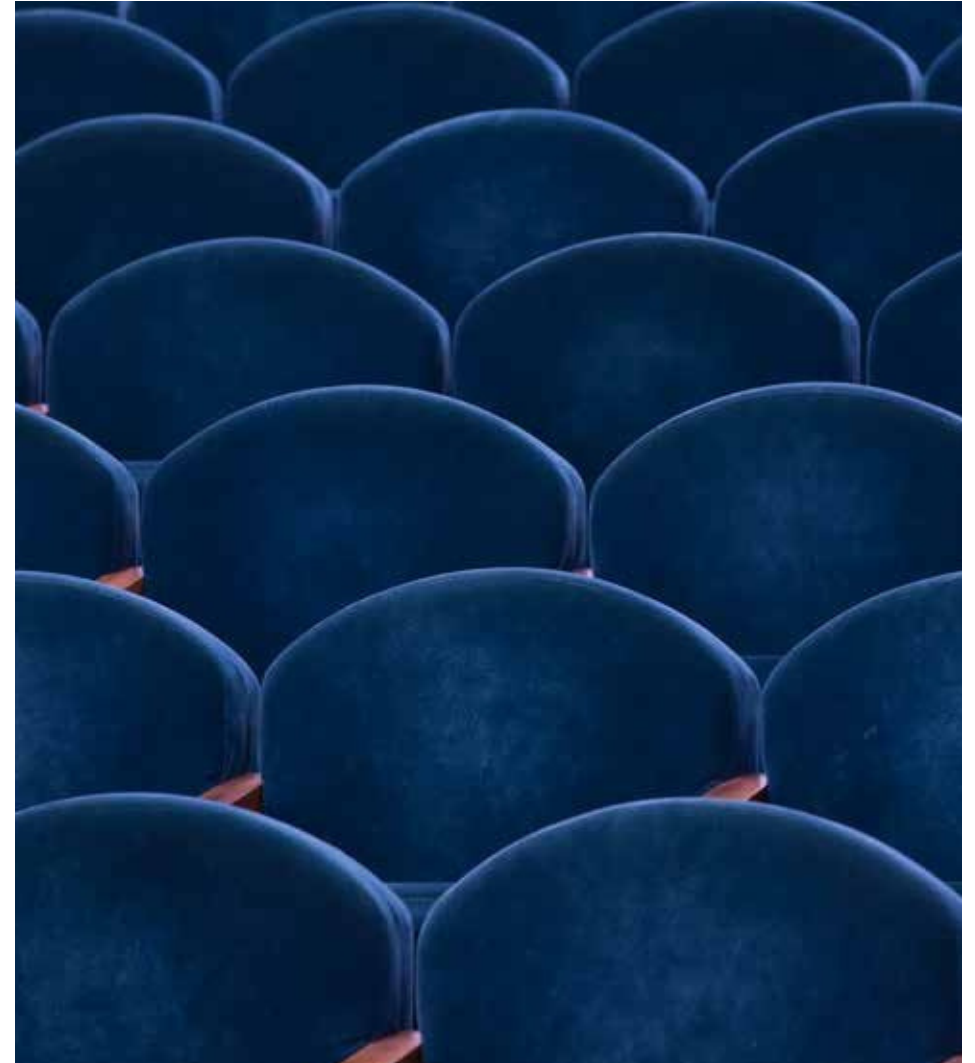

Real velvets.

Real velvet requires a flawless manufacture with meticulous hair treatment due to its **great complexity** of three-dimensional intricacy.

Dabedan is one of the few enterprises in Europe that manufactures real velvet since it has always chosen to invest in **cutting-edge looms** in order to continue producing fire-resistant, highly beautiful, and inspiring velvets.

For decorating hotels, theaters, events rooms, and other venues, as well as for being used in the most demanding upholstery, the creation of true velvet is a **bonus of security, softness, and elegance.**

Do you like to touch one of the most unique velvet collections ever created?

Dim out.

In the dim out curtains of Dabedan is where they converge 3 of the most demanded properties on the market which are yet a challenge nowadays: opacity, resistance and comfort.

The screening textiles of the "**Ultra Opacity**" series have an inherent structure that allows them to achieve a high opacity of more than 95% without the use of resins.

This **naturalness** allows you to experiment with different weights and finishes to give the cloth a variety of styles that dress the space and provide a satisfying feeling of comfort.

Sheers.

Designed to **create environments** from the background, Dabedan lace curtains are in charge of providing a space with **minimalism, comfort, freshness, color, elegance, naturalness and security.**

The quality of spinning, weaving, and finishing of **our lace curtains**, which are made of technical fire-resistant polyester fibers, **ensures a unique and superior resistance for professional use.**

Dabedan provides over 15 different lace curtain sets in a variety of colors, textures, and tones, as well as gloss and matte finishes. Because of our diversity, we are able to offer a one-of-a-kind selection all over the world.

Multipurpose Fabrics.

Dabedan offers all its expertise and technology to the design and production of a diverse range of **versatile, inspiring, and fire-resistant fabrics** that can be used in any setting.

This collection provides alternatives to conventional velvets, multi-purpose canvases, two-way textiles faces, matte and satin, taffeta, twill, and satin for cushions, curtains, coverings, tents, and curtains for events and residences

Pioneers in sustainable production and social commitment.

Dabedan has included, since its inception in 1984, **environmental, economic, and social commitments** into its business strategy.

- The current equipment consumes **20% less energy** than the previous one.
- Class A LED lighting and light sensors in the factory and warehouses.
- The energy is powered by **photovoltaic solar panels.**
- We offer our customers a range of fabrics made with 100% recycled yarns.

Pioneers in sustainable production and social commitment.

- The proximity business allows us to reduce transportation and pollution on the earth.
- All employees go through internal training protocols and personal promotion.
- All of our fabrics meet the OEKO TEX standard, ensuring sustainable production, human safety, and environmental sensitivity.
- We calculate our carbon footprint and carry out reforestation actions in nearby forests.

We are aware that, by applying a responsible thinking to our production processes and distribution, we will be helping you to create sustainable and respectful projects with the planet for your customers.
