

DISCOVER THE DEEP TEXTILE TRADITION IN  
MORE THAN 1,200 NEW AND INSPIRING FABRICS  
OF **CERTIFIED HIGH QUALITY**

COMPANY PRESENTATION DOSSIER

The world is calling for a **sustainable textile industry** – one capable of responding efficiently to market demands without losing **innovation, service, quality or social commitment.**

**What do you expect from the textile industry?**

“Innovation and Quality Through FR Textile Tradition”

Dabedan is a global company, a leader in the design, manufacture and marketing of flame-retardant fabrics for the decoration of public spaces.

Global, because we work with companies and professionals like you in **more than 40 countries worldwide**.

A leader, because for over four decades we have been developing authentic **velvets, sheers, blackouts, upholstery, acoustic and multipurpose fabrics** that have inspired the projects of over **4,000 clients in the contract, decoration and textile professional sectors**.

**Design.**  
**Technical expertise.**  
**Global service.**

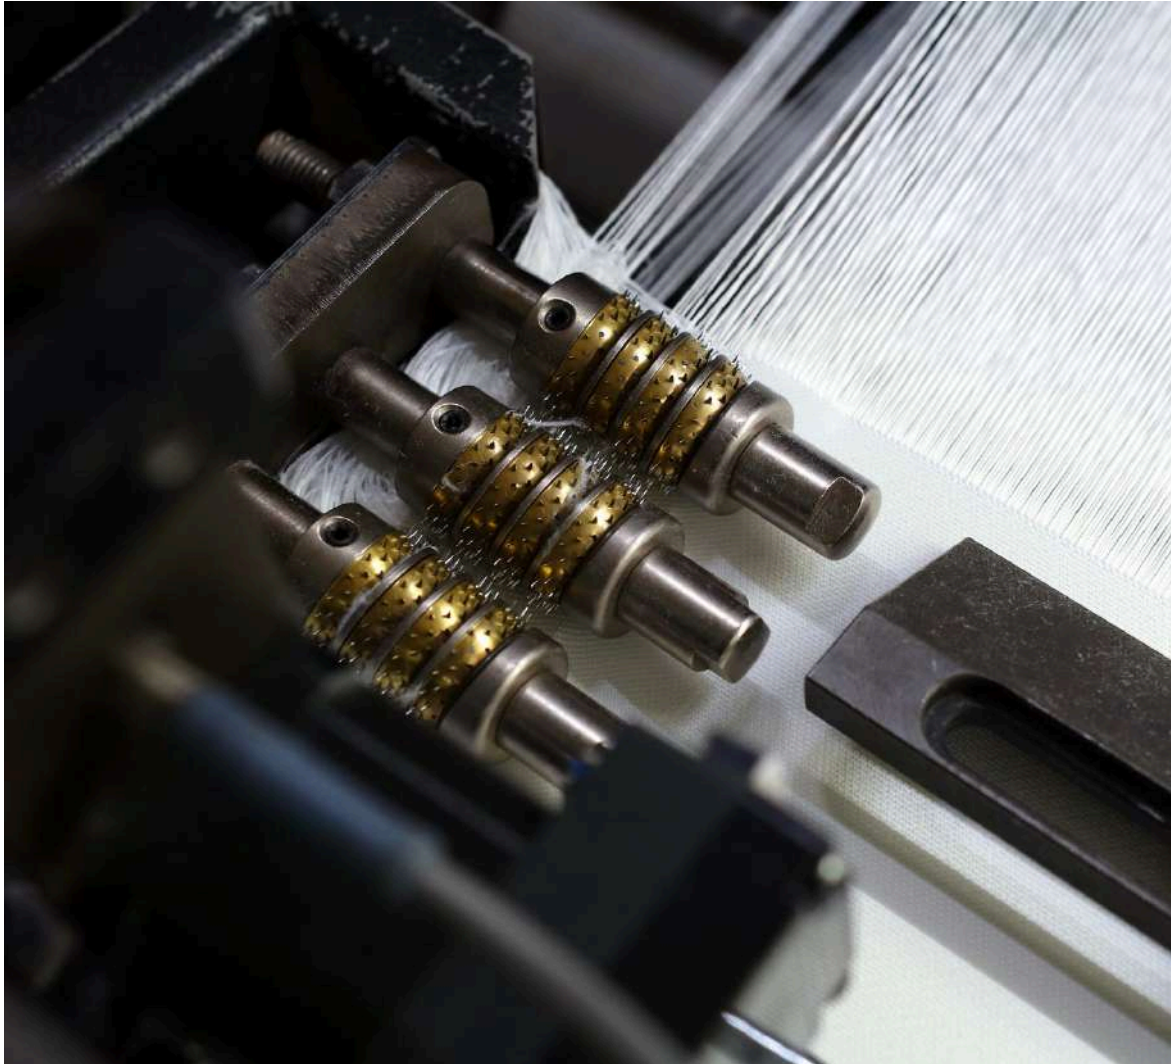

# Own manufacturing. Technology. Proximity

Our 52 state-of-the-art looms allow us to optimise production and guarantee a delivery time between **1 and 30 days**.

More than **500,000 metres of high-quality finished fabric** are produced using **inherently flame-retardant polyester fibres**, such as Trevira CS, in a wide range of colours, textures and structures — ready to serve.

We are firmly committed to **local industry**, sourcing our raw materials from nearby suppliers to ensure quality, total product control and responsible manufacturing.

## (Co)Development. Added value.

For four decades, Dabedan has been developing and perfecting high-quality products and creating inspiring collections of its own design, in collaboration with **AITEX** (Textile Technological Institute) and prestigious European laboratories such as **IFTH** and **FCBA** in France or **HOCH** in Germany, among others.

**(Co)Development** is the process through which Dabedan's engineers work closely with each client to find unique, customised solutions, integrating our technology into each project's value chain.

# Innovation. Beyond aesthetics.

## STAINWALL

---

W Stainwall®

We have developed a fluorocarbon polymer that is **free from PFOS and PFOA**, forming a protective network around the fibre without affecting the flame-retardant performance.

- Water-repellent
- Stain-resistant
- Breathable
- Durable
- Lightfast
- Abrasion-resistant

## CLINIC

---

In collaboration with medical professionals, we have also developed an **antibacterial treatment** applicable to any fabric designed for hospitals, clinics and healthcare facilities, preventing the spread of *Staphylococcus Aureus* and *Klebsiella Pneumoniae*, two of the most common bacteria in medical environments.

# Innovation. Beyond aesthetics.

## ACOUSTIC 3D

---

A technical fabric designed with a **three-dimensional structure** to improve the acoustic comfort of any space by reducing external noise and enhancing sound quality.

With an **Alpha value of 0.95** (UNE EN ISO 11654:1998) and flame-retardant performance, it is ideal for curtains, panels and ceilings in theatres, auditoriums, restaurants, classrooms and any public space requiring perfect acoustics.

## EXTRA DARK NIGHT

---

It is the **first resin-free and plastic-free textile** that eliminates light transmission while guaranteeing **total blackout**.

Being **100 % textile**, it has a pleasant touch and a natural appearance compared to conventional resin-coated fabrics.

It is **fully washable, recyclable** and its production is certified as safe for people and environmentally responsible.

## Certified quality.

All Dabedan fabrics are subject to **strict in-house quality controls** during production.

Our Quality Department tests every fabric produced, analysing and verifying compliance with **international standards for flame resistance, tensile strength, lightfastness, abrasion and pilling**, ensuring that every Dabedan fabric meets the requirements of **high-performance FR textiles**.

As **European leaders in flame-retardant textile manufacturing**, our products comply with both international fire resistance standards and specific national regulations.

# High quality is only possible through:

Profound respect for textile tradition and heritage

Full confidence in research and development

A strong commitment to state-of-the-art technology

Meticulous control of every production process

Genuine responsibility towards the planet

**Inspiration and great  
stories are born from the  
smallest details.**

”

**JULIO PERET**

Executive Director, Dabedan

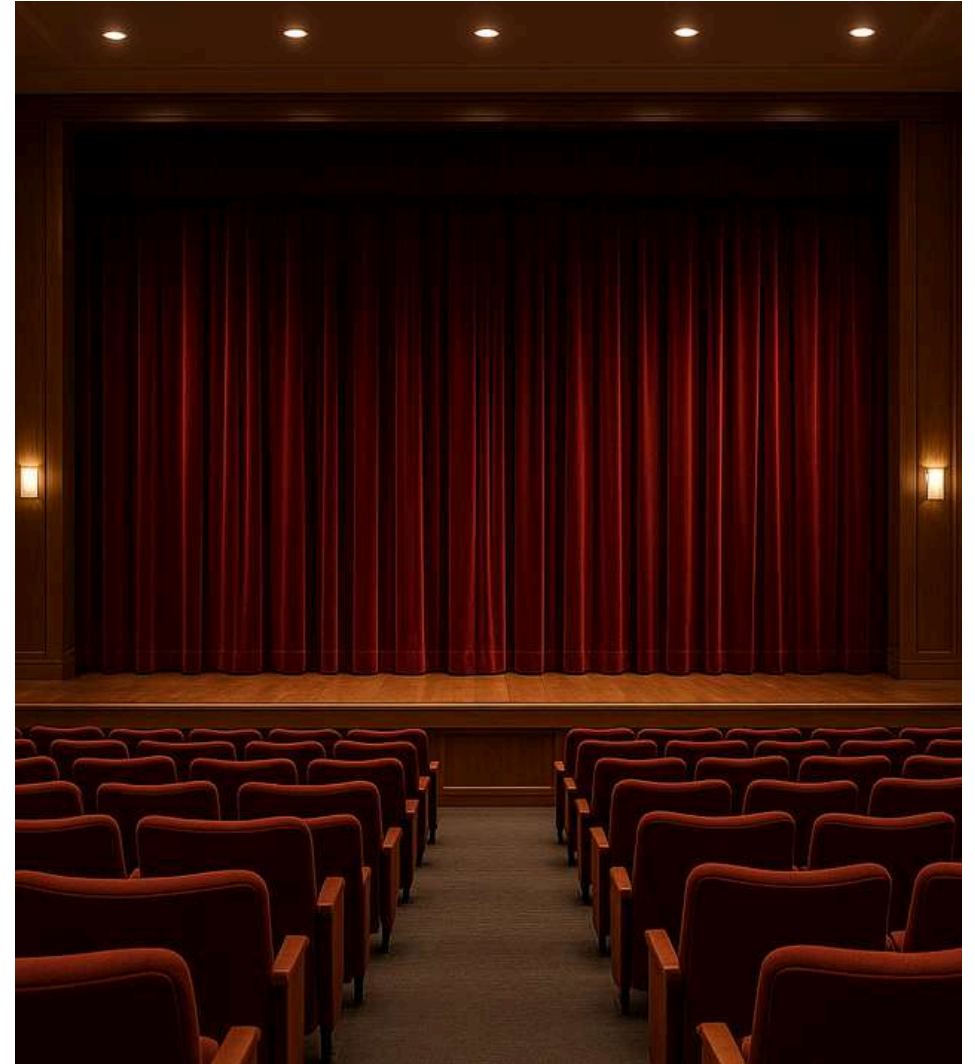

# Authentic Velvets.

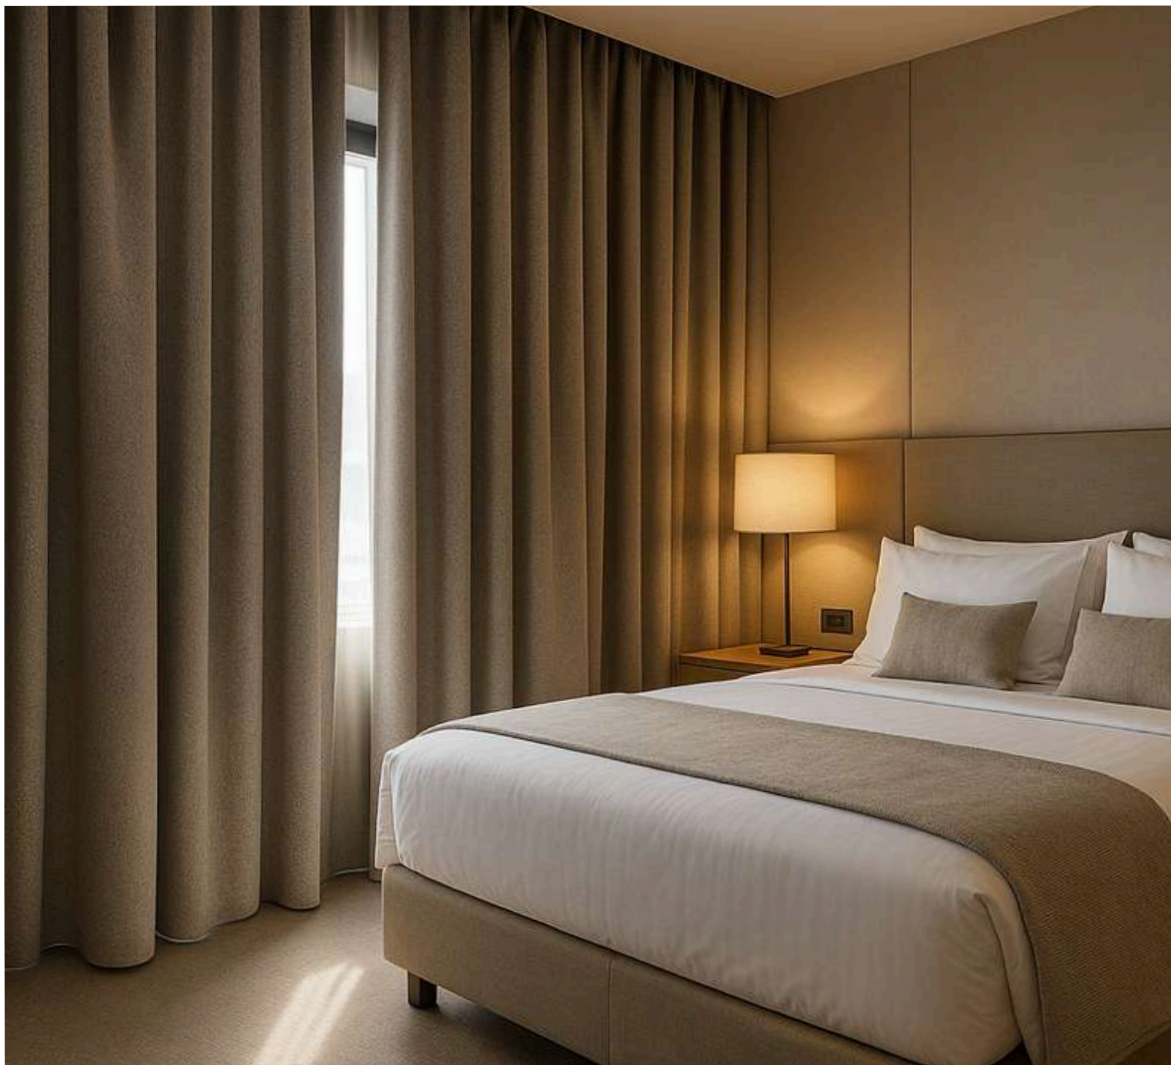

Due to their complex three-dimensional structure, **authentic woven velvets require a perfect production process**, where the pile must be carefully crafted to achieve their unique texture and quality.

Dabedan is **one of the few companies in Europe still manufacturing authentic velvet**, thanks to continuous investment in the latest weaving technology.

Our flame-retardant velvets offer an exceptional combination of **safety, softness and elegance**, making them ideal for hotels, theatres, event venues and high-end upholstery.

**Would you like to discover one of the most special velvet collections made in the world?**

## Dim-outs.

These dim-out fabrics combine opacity, strength and comfort — three of the most demanded properties in today's market — while maintaining a natural textile appearance and soft hand.

Our **Ultra Opacity** series is based on an internal structure that provides over **95% light blocking without using resins**.

This natural quality allows the fabric to play with different weights and finishes, giving each piece a unique aesthetic character that dresses the space and creates a satisfying sense of comfort.

# Sheers.

Designed to create atmosphere and visual lightness, Dabedan's sheers bring **minimalism, comfort, freshness, colour, elegance and safety to any space.**

Composed of **inherently flame-retardant polyester fibres**, our sheers provide superior durability and resistance for professional use.

Dabedan offers more than **15 collections of sheers**, in a wide range of colours, textures and finishes — both shiny and matte.

## Multipurpose Fabrics.

We apply all our experience and technology to create a wide range of **versatile and inspiring flame-retardant fabrics** suitable for any decorative environment.

This collection includes **alternatives to traditional velvets, polyvalent canvas weaves, double-sided, satin and taffeta fabrics** ideal for cushions, drapery, covers, tents and event decoration.

# Pioneers in sustainable production and social commitment.

Since its founding in 1984, Dabedan has integrated **environmental, economic and social sustainability** into its corporate strategy.

- New machinery **reduces energy consumption by 20%** compared to previous models
- **A-rated LED lighting** and motion sensors in all production areas and warehouses.
- Energy generated by **solar photovoltaic panels**.
- Collection of fabrics made from **100% recycled yarns**.

# Committed to proximity and circularity.

- **Proximity manufacturing** reduces transport needs and carbon emissions.
- Internal training and **professional development programmes** for all staff.
- All fabrics comply with **OEKO-TEX® Standard 100** for human and environmental safety.
- **Carbon footprint measured** and **offset through reforestation projects** with Bosques Sostenibles.
- Circular Pass® programme ensures **traceability and recyclability of materials** at the end of their life cycle.

**By applying responsible thinking to our production and distribution processes, we help our clients create projects that are sustainable and respectful of the planet.**

”

JUAN PERET

CEO, Dabedan

**Excellence is not promised, it is demonstrated.  
Quality is not seen, it is felt.**

If you are ready to see, touch and feel the collections that inspire the most demanding textile professionals, it's time to contact us.
