COMMITMENT TO SUSTAINABLE DEVELOPMENT

Dabedan's Environmental Policy reflects our commitment to conducting operations in accordance with the principles of sustainable development. We ensure proper oversight and management of the environmental impacts we generate, particularly those of greatest significance. This policy also provides a unified framework for defining objectives and implementing actions that foster the continuous improvement of our environmental management system.

KEY COMMITMENTS

1 Environmental Protection: We strive to prevent pollution and minimise the environmental impacts arising from the activities carried out at our facilities.

2 Legal Compliance: We are committed to complying with all applicable environmental legislation in the countries where we operate, along with the commitments we voluntarily assume.

3 Indicators and Reporting Mechanisms: We develop indicators and reporting mechanisms that enable us to objectively evaluate the environmental impact of our offices, warehouses, and production sites.

4 Awareness and Training: We promote environmental awareness among all employees by offering training and encouraging their active participation through improvement suggestions.

5 Specific and Measurable Objectives: We establish specific and measurable environmental goals within a defined programme, which are reviewed annually based on results achieved.

6 Periodic Assessment of Environmental Aspects: We conduct an annual assessment of the environmental aspects linked to our operations, aimed at maintaining and improving our practices.

7 Respect for Nature and Biodiversity: We uphold our commitment to protecting nature and biodiversity in the areas surrounding Dabedan S.L. facilities.

ENVIRONMENTAL MANAGEMENT - 3 CORE PILLARS

OUR ENVIRONMENTAL MANAGEMENT IS BASED ON THREE ESSENTIAL PILLARS:

- 1. Caution:** Avoid actions that could pose an environmental risk, regardless of perceived severity.
- 2. Prevention:** Reduce potential environmental consequences associated with specific activities.
- 3. Correction:** Develop strategies to mitigate environmental impacts in the event of an incident.

CORPORATE APPROACH

Our management approach to the environment is defined by a proactive outlook and a commitment to implementing tangible, measurable actions. We promote proactive initiatives for environmental protection, viewing this as a cornerstone of effective corporate governance.

ACTIONS FOR ENVIRONMENTAL SUSTAINABILITY

To reduce the environmental impact of our activities, Dabedan has implemented the following measures:

- Production of textiles using recycled yarns and fully recyclable materials.
- Collaboration with Revivack through the Circular Pass® system to ensure traceability and recovery of end-of-life textiles.
- Generation of self-produced renewable energy via solar panels.
- Full replacement of lighting systems with LED units equipped with motion sensors.
- Ongoing modernisation of machinery to minimise energy consumption.
- Annual assessment of our carbon footprint.
- Local reforestation initiatives to offset our emissions.
- Agreements with authorised waste managers for the recycling of fabrics, paper, plastics, oils, and cardboard.
- Use of recycled paper across all offices.

JOIN US ON THIS MISSION

Climate change presents a global challenge, yet also opens opportunities for innovation and continuous improvement.

At Dabedan, we reaffirm our commitment by integrating sustainability into every aspect of our operations, promoting a more responsible and circular production model.

OUR SUSTAINABILITY DEPARTMENT

Our Sustainability Department is currently developing projects focused on:

- **Carbon footprint** measurement and **forest offsetting** through *Bosques Sostenibles*.
- **Recovery and recycling** of flame-retardant fabrics via Circular Pass®.
- **Improving energy efficiency** across industrial operations and office environments.

A Unified Commitment

At Dabedan S.L., these principles form an integral part of our corporate identity.

We advocate for environmental improvement, allocate the necessary resources, and promote the involvement of all team members to ensure the effective implementation of this Environmental Policy.
